ERTICO welcomes its New Partner SALFO Engineering & Management

SALFO Engineering & Management is an internationally recognised engineering and management consultancy firm with over three decades of extensive experience. Their services encompass a comprehensive range of transportation solutions, including the planning, design, and management of projects across road, rail, air, and maritime sectors.

With a robust presence in Europe and the Middle East, SALFO is adept at managing complex projects tailored to the diverse needs of these regions. SALFO's expertise is deeply rooted in the development and integration of intelligent transport systems (ITS), which elevate the functionality, safety, and environmental sustainability of transportation networks. Utilising cutting-edge technologies and innovative strategies, they set industry standards for efficiency and sustainability, aligning perfectly with ERTICO's mission to promote ITS technologies across Europe and further afield.

The ERTICO Partnership bridges the gaps between stakeholders across the ITS community to help make mobility safer, more efficient and sustainable. Together, we lead the digital transformation of transport through the development of cutting-edge technologies, new services and innovative mobility solutions to move people and goods in smarter ways. Our Partners share the joint mission to actively promote sustainable collaborative relations with EU institutions and policymakers by connecting local and regional transport organisations with national authorities.

"ERTICO warmly welcome SALFO Engineering & Management to our Partnership. Their extensive expertise in delivering innovative and sustainable transportation solutions aligns perfectly with our collective vision to drive the digital transformation of mobility," comments Joost Vantomme, ERTICO CEO. "SALFO's commitment to advancing intelligent transport systems will undoubtedly strengthen our partnership and joint efforts to make mobility safer, more efficient, and environmentally sustainable for all."

SALFO Engineering & Management is eager to join ERTICO – ITS Europe to engage more deeply in the development of intelligent transportation systems (ITS). Joining ERTICO represents an opportunity to collaborate with leading experts and institutions, allowing us to share our knowledge and gain new insights. This engagement is key to enhancing our ability to innovate within the ITS field, ensuring our projects are both effective and forward-thinking.

Participation in ERTICO will enable SALFO to leverage the network's vast resources, including collaborative projects and research initiatives that advance technical capabilities and sector influence. We are excited about contributing to and benefiting from ERTICO's diverse programs, which support the development of smart mobility solutions essential for addressing contemporary global transportation challenges. This involvement will not only improve their service offerings but also amplify the broader impact on the transportation sector worldwide.

Joining the ERTICO Partnership is an important way to connect the dots between different sectors across the mobility ecosystem, enabling close collaboration between stakeholders to advance innovation and deployment of intelligent transport systems and smart mobility solutions in Europe and beyond.

About ERTICO – ITS Europe: Founded in 1991, ERTICO is a European public-private partnership organisation, pioneered by the European Commission in 1991. With 120 members, connecting eight sectors across the ITS community. ERTICO embodies thought leadership and stakeholder engagement through facilitating, contributing and promoting innovation through European co-funded partnership projects, innovation platforms, mobility data spaces and international cooperation advocacy. ERTICO organises the ITS European Congress for two consecutive years, attracting more than 3,000 attendees from 50 countries and every third year, the ITS World Congress which welcomes up to 15,000 attendees from 100 countries.
